

NEW ABUSE REPORT

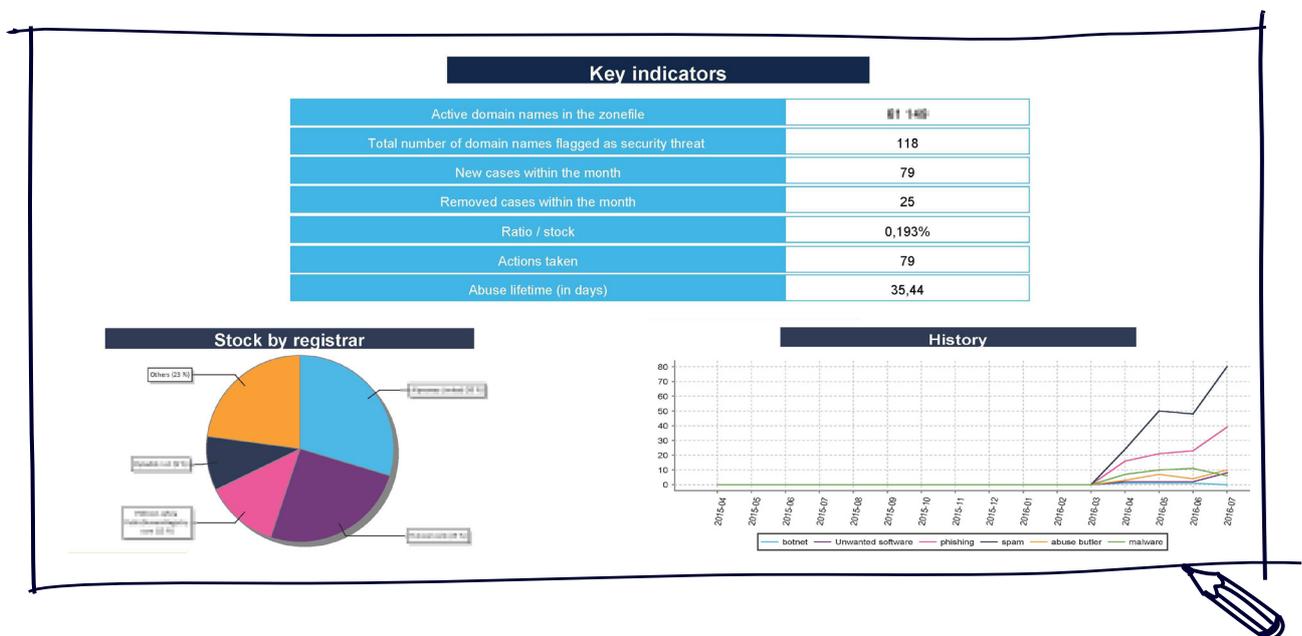

AFNIC RENEWS ITS ABUSE DETECTION AND MONITORING SOLUTION.

To allow gTLDs to comply with specification 11.3b of the ICANN registry agreement and its clarifications, Afnic is changing its Abuse report. In addition to measuring the quality of your assets (phishing, malware, botnets, spam, etc.), the tool now allows you to track potentially abusive operations on domain names.

The tool's **4** main functions are:

1. Daily monitoring of the customer base;
2. Transmission of email alerts to the registry, the registrar and the holder, with the identification of each new abuse;
3. Monitoring of operations carried out on all of the potentially abusive domain names;
4. Generation of a full monthly monitoring report.

The main information provided by the monthly report:

- **Monitoring indicators of identified abuse and the operations carried out;**
- **Multiple criteria to analyze potential abuse;**
- **Lists :**
 - List of abusive domain names in the month
 - List of domain name delisted during the previous month
 - Lists of operations carried out: removal from the blacklist, deletion of the domain name, etc.

Actions follow up table												
	M-11	M-10	M-9	M-8	M-7	M-6	M-5	M-4	M-3	M-2	M-1	07-2016
Case ratio / parc	-	-	-	-	-	-	-	-	0,1%	0,16%	0,15%	0,23%
Identification	-	-	-	-	-	-	-	-	53	91	89	143
Mail to registry	-	-	-	-	-	-	-	-	53	91	89	143
Mail to registrar	-	-	-	-	-	-	-	-	53	91	89	143
Removed by registrar or registry	-	-	-	-	-	-	-	-	-	3	5	4
Removed from blacklist	-	-	-	-	-	-	-	-	6	24	20	21
